

# Getting started with Table Ordering

## How does it work?

## Why table ordering?

A simple and effective additional channel: guests scan the QR code at their table, view our menu (no app required), and then order and pay in their own time.

Designed to work with you: Removes the need for you to take orders, enter them into the POS system, and take payments. More time to focus on the guest experience and to engage with your customers on a more personal level.

Gives guests choice and control: Guests benefit from being able to enjoy their experience, all without having to wait for service. However, they can still order through their server if they prefer.

# Getting started with Table Ordering

## The benefits

To see the true benefits of Table Ordering, it's important to empower guests to use it.

Customer success: Winner Winner			
 Improved customer experience		 Increased customer satisfaction	
 <p>Table ordering accounts for</p> <h1>58%</h1> <p>of all orders</p>	 <p>Average transaction value</p> <h1>20%</h1> <p>increase after implementation</p>	 <p>Turnover</p> <h1>20%</h1> <p>customers order faster and turn tables faster</p>	 <p>Customers are</p> <h1>5X</h1> <p>more likely to order more</p>

## Getting your guests onboard

- Seat your guests and let them know they can order through the QR code at the table - no app download required.
- Walk your guests through how to order using the QR code.
- Let guests know they can order and pay multiple times or choose to start a tab.
- Discuss the menu, answer any questions they may have, and find ways to upsell perfect menu pairings.
- Let them know you're here to help, but by ordering through the QR code they have complete control over their experience.
